Activity 1 – Concept Check

1. Mobile Network Information Investigation

Use your phone settings.
Go to
Settings → About Phone → SIM Status / Network
Identify:

a. Network Type (4G/5G/Wi-Fi) -
b. IP Address -
c. MAC Address -
d. Wi-Fi SSID -
e. Signal Strength –
f. Internet speed –

Map each item to the OSI layer.

Mobile Information	OSI Layer
IP Address	
MAC Address	
Wi-Fi	
HTTPS	
Signal Strength	
Internet Speed	

2. Speed Test Analysis

Install: Speedtest by Ookla
Perform one speed test in your mobile or laptop
Identify:

- Download Speed -
- Upload Speed -
- Ping -
- Server -

Answer the following Question:

a. Which OSI layer measures speed?
b. Which layer is responsible for routing?
c. Which layer carries the bits?
