Computer Vision

Assignemnt-1

Note: Explain the question with the help diagram, if required. Also use the proper equations form explanation.

Q1. Explain the Fundamentals of Image Formation with example.

Q2. Describe the concept of Convolution and Filtering with example.

Q3. Describe the following: -

- Fourier Transform Formula
- Forward Fourier Transform
- Inverse Fourier Transform
- Properties of Fourier Transform

Q4. Explain the Histogram Processing with OpenCV library in Python.

Q5. Describe some common feature descriptors used in image processing with example,
